SUMMARY: Our RoSPA accredited 2-day Advanced Winch Operator training course, is aimed at operators who may be expected to manage winching operations, or run complex and multi-line pulls themselves. Courses will usually be run with the equipment that the candidates will be expected to use, and can include hand winches (tirfor or capstan types), vehicle mounted winches (hydraulic, PTO or electric, including fast spool types), or stand-alone winches (static or trailer mounted).

All CTA courses are designed to be responsive to the requirements of the clients, and our highly experienced winch instructors will tailor the delivery of the training to the needs of the candidates.

Our winch operator and recovery training courses set the industry standard for reducing risk during hazardous operations.

Whether you need winch training for operators in forestry, agriculture, or heavy engineering, or have a team of drivers using 4x4s and all-terrain vehicles off-road, our courses are a practical and effective way of providing them with the knowledge, skills and ability to assess and manage risk.

Our highly experienced trainers can travel to your workplace to run the course, using your machines, vehicles and equipment, or we can provide generic training using our equipment at one of our sites - the choice is yours.

ROSPA ACCREDITED PROFESSIONAL WINCH OPERATOR (ADVANCED) COURSE CONTENTS:

- Legal framework (HASAWA - PUWER, LOLER, PPE, MHSWR)
- Equipment checks and suitability
- Personal Protective Equipment
- Assessment and design of winching operation
