**SUMMARY:** In the workplace, there are many reasons why good health and safety practices must be implemented and maintained. These include legal reasons, such as complying with the Health and Safety at Work etc Act 1974, moral reasons, including protecting your workforce from unnecessary injury, and financial reasons, such as reducing preventable costs to your business.

To ensure that these practices are maintained, it is essential that your workforce receives appropriate training that is suitable for their role in order to allow them to work more confidently and safely.

## **COURSE OUTLINE**

### **Introducing managing safely**

- The key reasons for managing and working safely.
- Who is responsible for safety and health in the workplace?
- Safety management systems.

### **Assessing risks**
